

Vrinda Store Sales Analysis – 2022

Excel-Based Dashboard & Insight Report

- By Ritik

Project Objective & Dataset

- . ● Analyzed ~31,000 order entries from Vrinda Store (2022)
- . ● Cleaned and summarized raw order data
- . ● Created pivot tables and dashboards for insights
- . ● Used slicers for interactive filtering across dimensions
- (month, gender, state, channel)

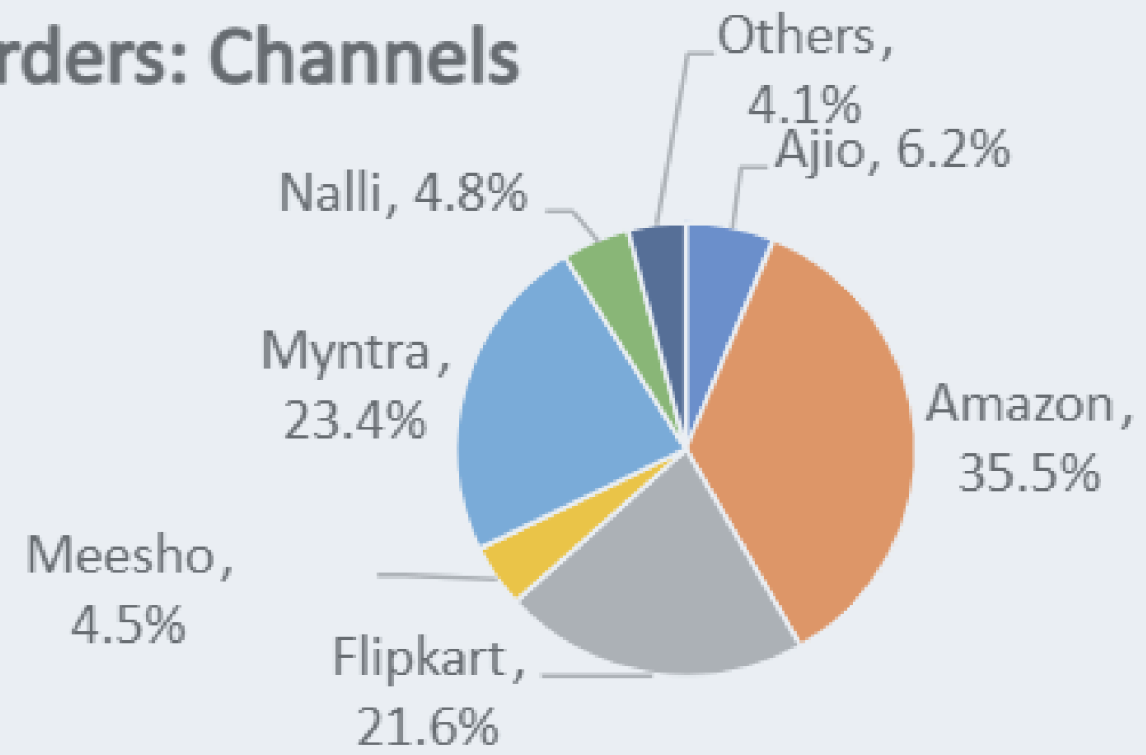

Data Cleaning Steps

- . ●Removed nulls, standardized values (e.g., “one” → 1)
- . ●Normalized gender and order status labels
- . ●Created new fields: Month (from Date), Age Group (based on Age)
- . ●Used Excel formulas like TEXT(), IF(), VLOOKUP()

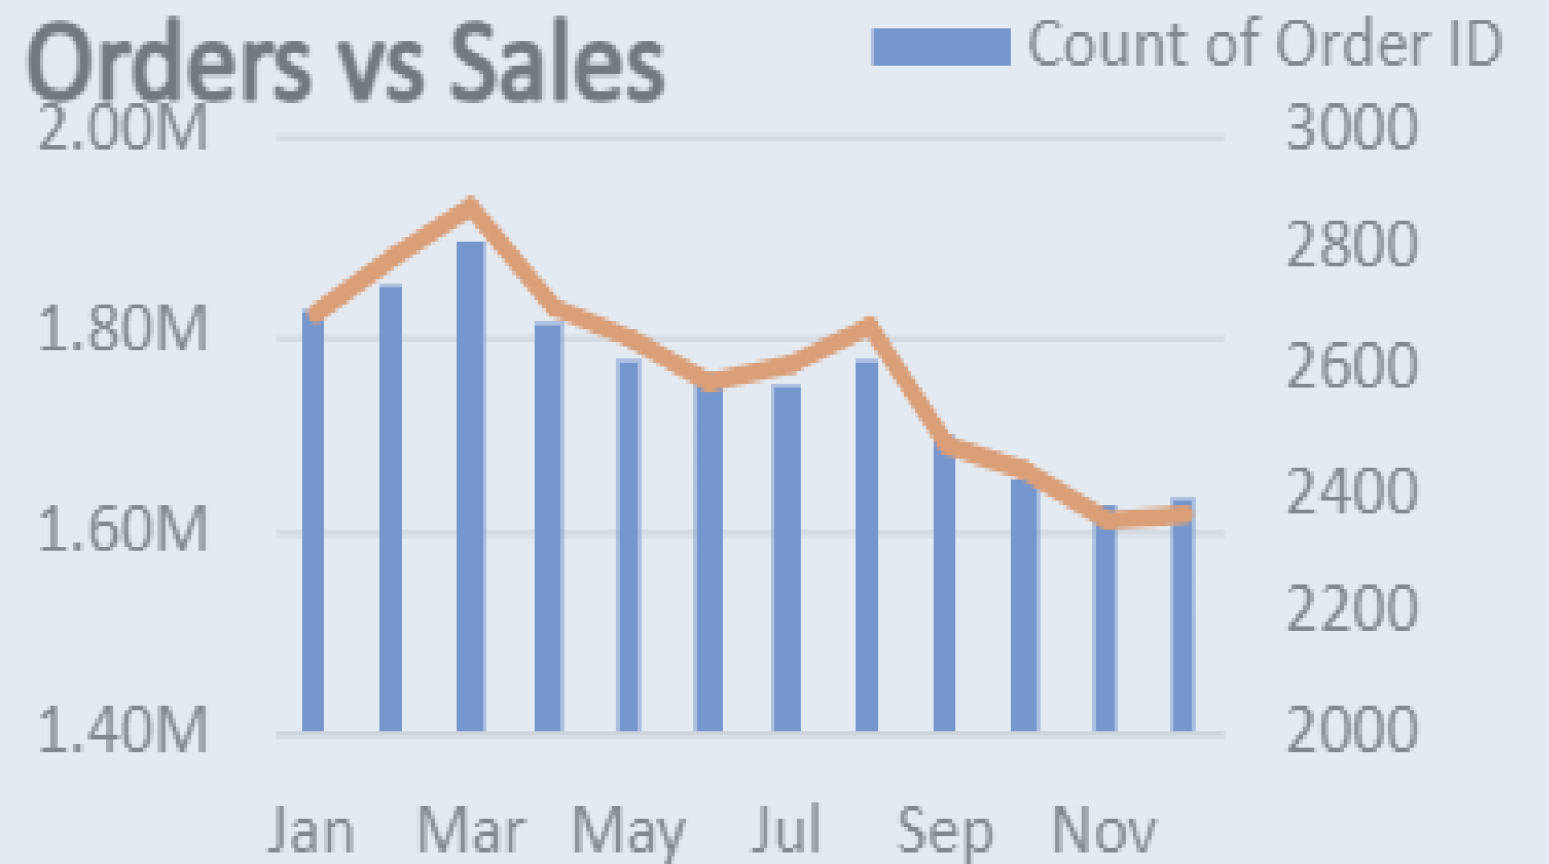

Charts & Pivot Tables

- . ● Monthly sales & order trends (sales vs orders)
- . ● Gender-wise revenue (men vs women)
- . ● Order status distribution (delivered, cancelled, refunded)
- . ● State-wise sales performance
- . ● Age-Gender cross-analysis
- . ● Channel-wise performance (Ajio, Flipkart, etc.)
- . ● Slicers for interactive filtering by month, gender, channel, age group

Orders: Channels

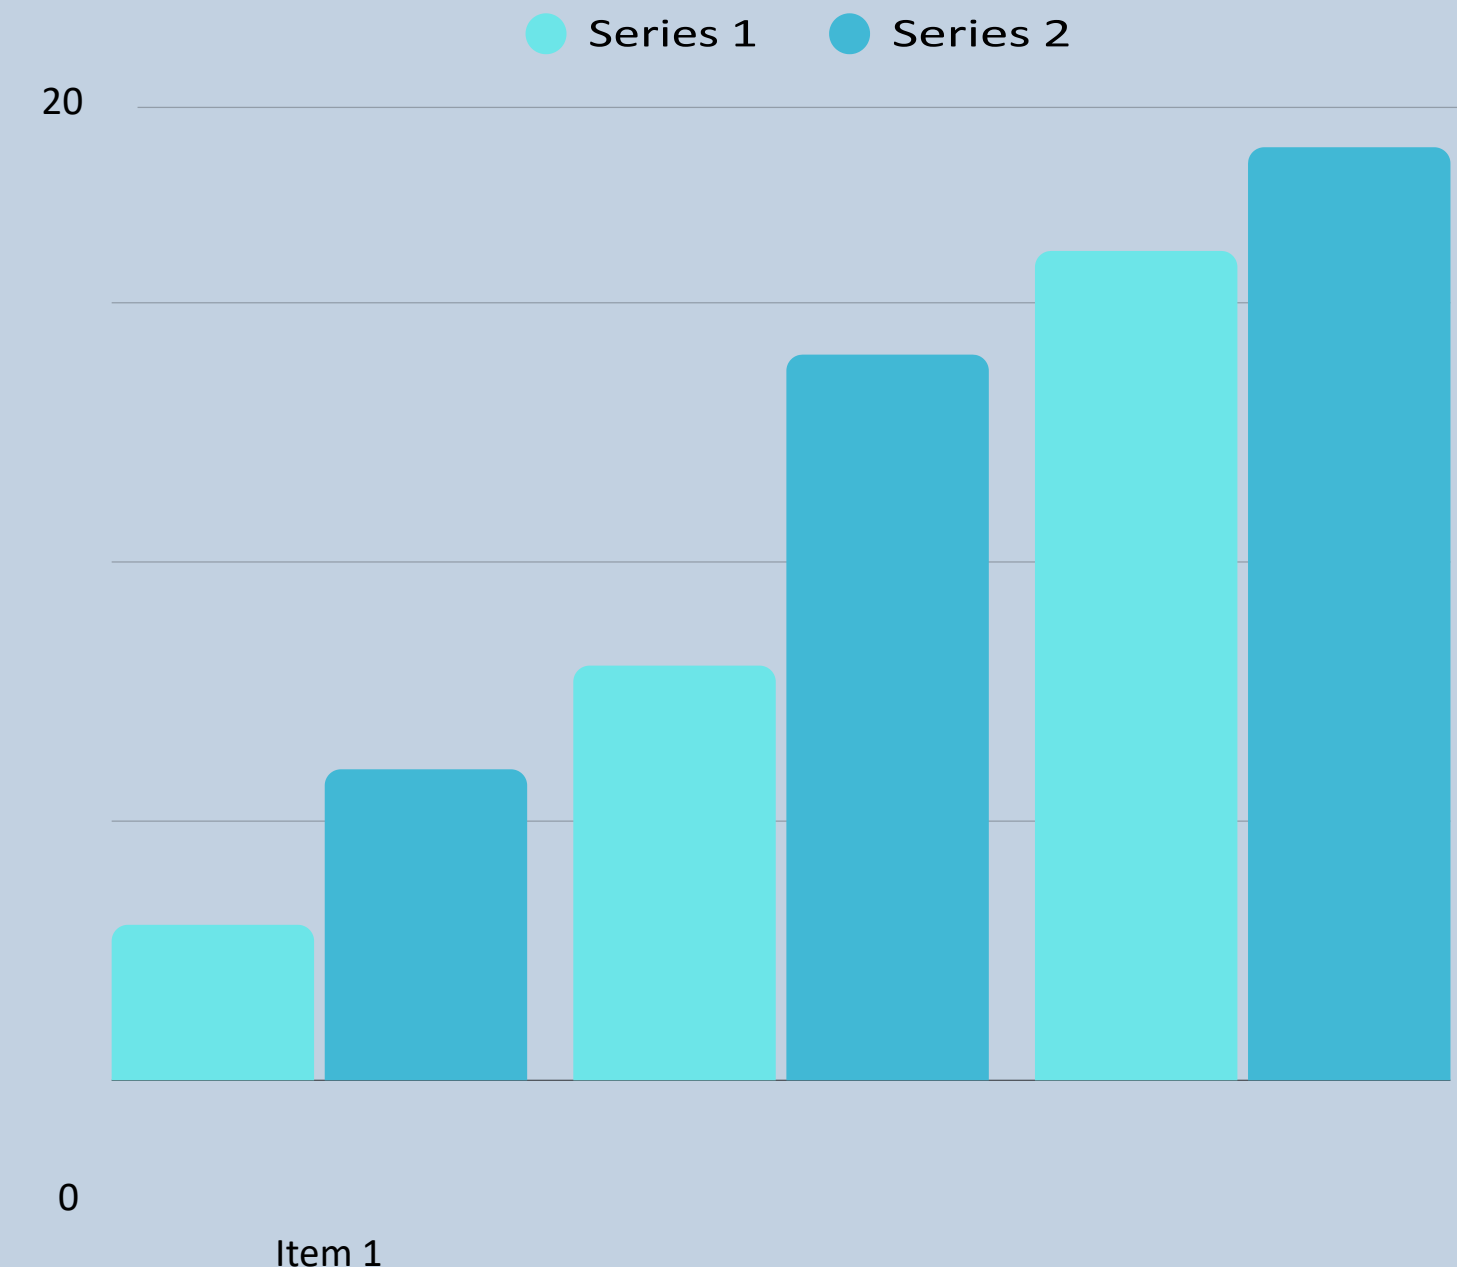

Orders vs Sales

Key Insights

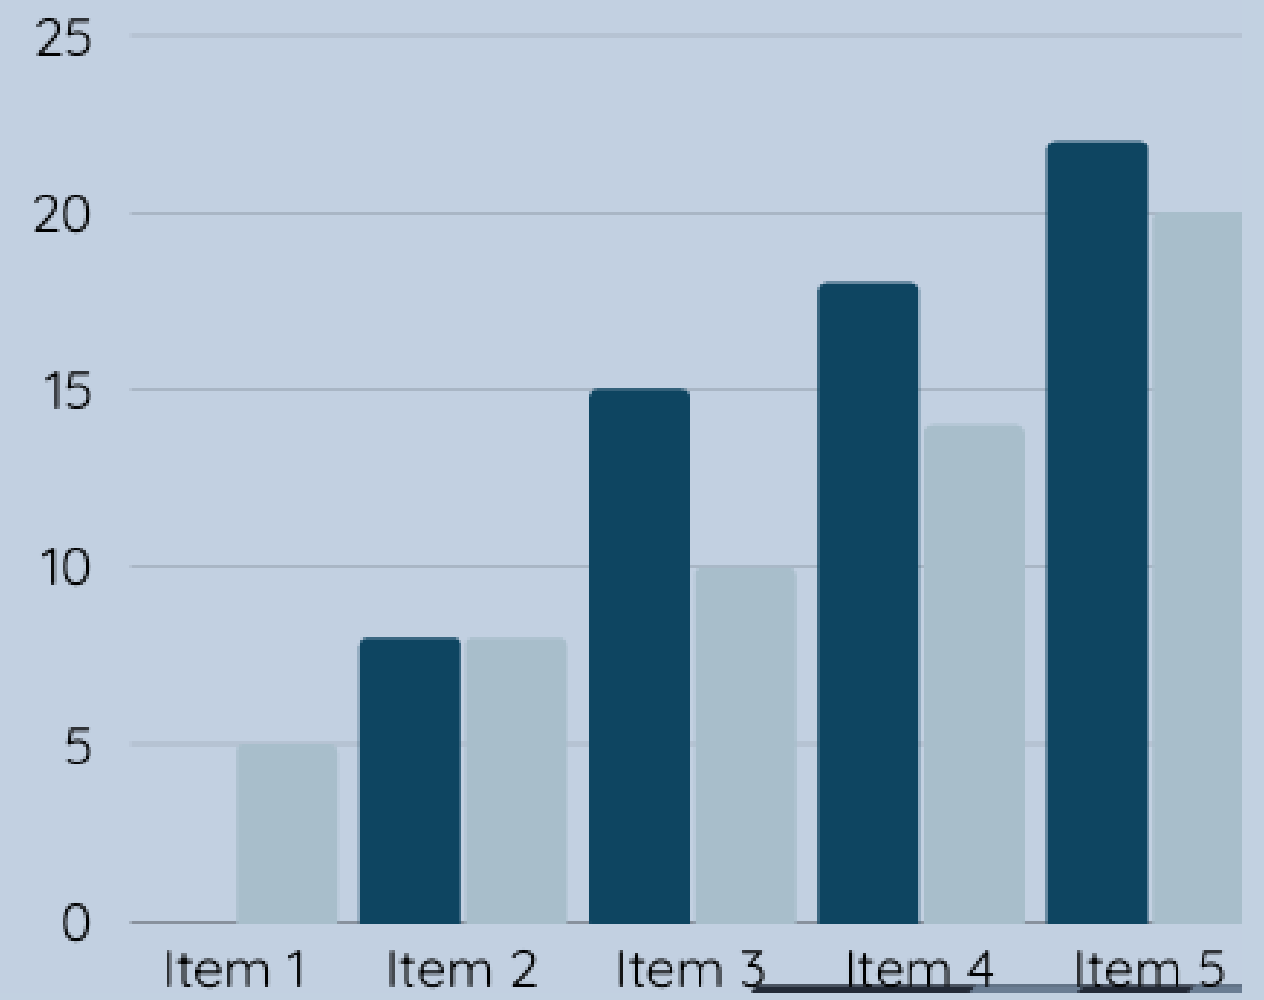

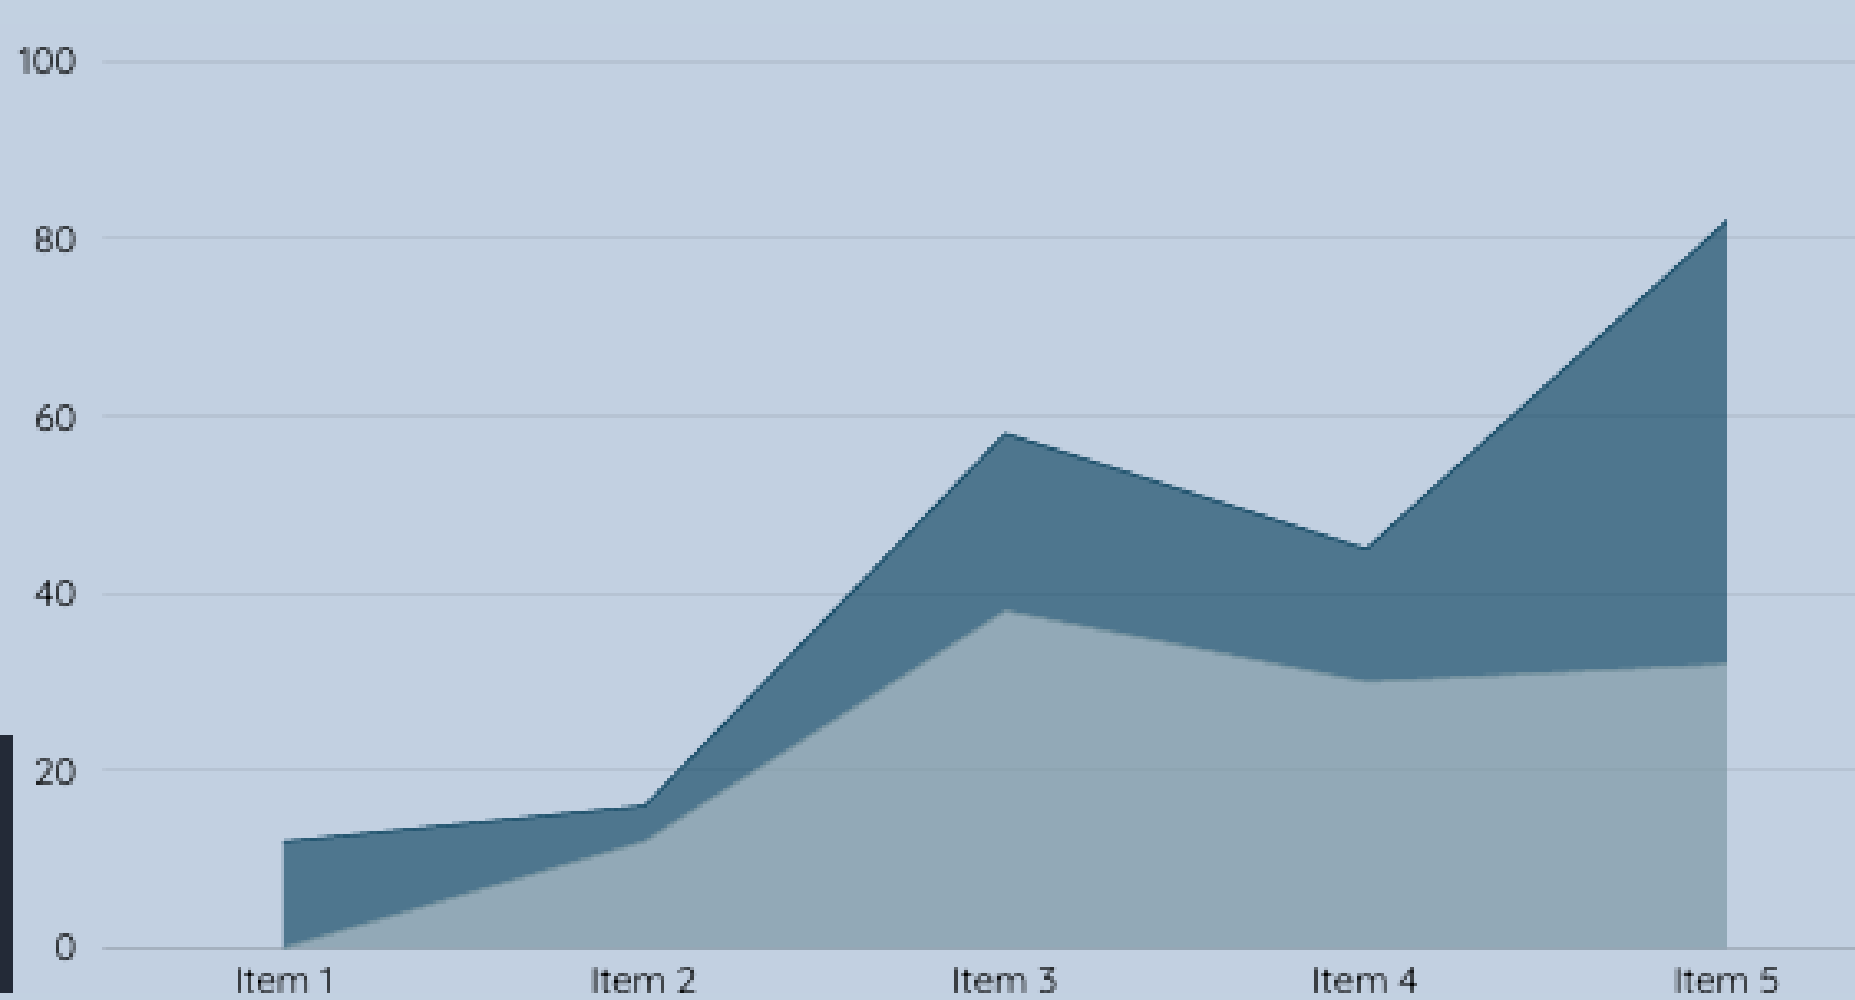

- ● February had the highest sales and order volume
- ● Women contributed ~64% of total revenue
- ● Most orders were delivered (~92%), with low cancellations
- ● Top 3 states: Maharashtra, Karnataka, Uttar Pradesh₁₅
- ● Adults (30–49) and young women were top customer groups
- ● Amazon, Flipkart, and Myntra were top-performing sales channels₁₀

Conclusion

- Dashboard helped identify buyer behavior and trends
- Excel slicers allowed easy filtering and deeper insights
- Project demonstrates ability to clean, analyze, and present real-world data
- Skills: Excel (pivot tables, formulas, slicers), data visualization, analytical thinking
